Resolved Issues

Student Information

Course Section Assignments

- Previously, when you used the **Drop** or **Transfer** option to move a student to another course section, after you reviewed the **Stop Date** and **Start Date** in the grid on the **Course Section Assignment** screen and click **Save Changes**, the reloaded grid sometimes displayed the wrong **Start Date**. Now, in this circumstance, the **Start Date** displays correctly.

Family Groups

- Previously, when a student was enrolled in 2 buildings within a district and then was withdrawn from one, users were no longer able to search, find, or add the student to a family group. Now, in this circumstance, you can search, find, and add the student to a family group.

Honor Rolls

- Previously, the honor roll calculation omitted courses with missing marks from the **Min Number of Courses** requirement even when a **Max Number of Missing Marks** was set, thus students were incorrectly excluded from the honor roll. Now, courses with missing marks are included in the calculation for the **Min Number of Courses**.

Identity Management

- Previously, when you created a new staff member record, sometimes their first and last names did not display in the **Staff** tab, although the names would display in the **Personal** tab. Now, in this circumstance, the first and last names display on both the **Staff** tab and **Personal** tab.
- Previously, users were unable to access the view-only version of the user record screen **Account** tab when they were assigned roles with the **Add** access setting enabled for the **View/Edit Account Roles**, **View/Edit Staff Impersonations**, and/or **View/Edit Account Groups** nodes but not the **Add/Edit Account** node. Now, in this circumstance, these users can access the view-only version of the user record screen **Account** tab.
- Previously, users were unable to access the view-only version of the user record screen **Staff** tab when they were assigned roles with the **Add** access setting enabled for the **View/Edit Staff Member Schools** and/or **View/Edit Staff Member Schools** node but not the parent **Add/Edit Staff Member** node. Now, in this circumstance, these users can access the view-only version of the user record screen **Staff** tab.

I want to... Menu

- Previously, when you printed a transcript from this drop-down menu, the state student IDs (SSIDs) of students who were registered after the load setting was created were excluded from the printed transcript. Now, in this circumstance, the SSIDs are included in the printed transcript.

Marks Analysis Report (R301)

- After the release of ProgressBook Suite v20.3.3, the report did not total by teacher or course. Now, the report displays the totals for teachers and courses.

Miscellaneous Data Groups

- After the release of ProgressBook Suite v20.3.0, when you attempted to add a **Pre-Defined List** definition to a miscellaneous data group and clicked on **View Pre-Defined List**, an error occurred. Now, in this circumstance, when you click **View Pre-Defined List**, you are taken to the **Miscellaneous Data Definitions Options List** screen.

Requests & Assignments

- Previously, when you used the **Drop** or **Transfer** option to move a student to another course section, the **Requests & Assignments** grid sometimes displayed the wrong **Start Date**. Now, in this circumstance, the **Start Date** displays correctly.

Transportation Import

- Previously, when you imported a file in which the values 0 or 1 populated the **Parking Permit, Assigned Space, Bus Number, Second Bus Number, and DistanceTransported** columns, the import process incorrectly identified those field values as **True** or **False** instead of the alphanumeric value, thus resulting in an invalid data error. Now, in this circumstance, the file import successfully without error.

User Interface

- Previously, the spacing of certain UI elements on some screens were irregular. Now, the UI elements are evenly spaced. ([StudentInformation Marks Guide](#))

StateReporting

Assessment Imports

- With the release of ProgressBook v20.1.0, when you tried to import a vendor file for the **SAT Import** option, no records were successfully imported, and on the **Assessment Import Management** screen **Errors** tab, the following error message displayed: String was not recognized as a valid DateTime. Now, in this circumstance, the vendor file imports successfully.

Staff/Course Reporting - Collection (L)

- After the release of ProgressBook Suite v20.3.0, when you ran the **Transfer - Staff Course (CU)** process, incorrect end dates were included for teachers who had left prior to the end of the year. Now, in this circumstance, the correct dates are included in the process.

Student Summer Withdrawal Record

- Previously, when a student was enrolled at 2 different districts and neither district withdrew the student timely, when one of the districts submitted the Student Summer Withdrawal (FL) record for that student, the second district could not submit a Student Summer Withdrawal (FL) record due to the duplicate SSID. Now, both districts can enter a Summer Withdrawal (FL) record for a shared student.
